**Moonbell** is a psych/shoegaze trio from San Francisco, CA. Their self-released, debut EP 'Figurine' came out to much acclaim around the San Francisco scene at the end of 2011, and we're ecstatic to present their follow-up EP, 'Parallel.' While the band has been compared to the likes of Spacemen 3, The Telescopes, Ride, early Verve & Chapterhouse, these five new tracks of thick, reverb-heavy noise have them pushing their musical boundaries even further, while establishing themselves as a band to keep your eyes (and ears) on.

As a bonus, we've also included the tracks from the 'Figurine' EP, just in case you may have missed them the first time.

### **Parallel EP (tracks 1-5)**

Parallel

Still Motion

Nothing Less

Just Like Waking Up

Nether Days

### **Figurine EP (Tracks 6-9)**

Figurine

Urgence

Nostalgia for the Future

White Light
